PORTFOLIO

Call my AI concierge to set up time and learn about my experience.

EXECUTIVE SUMMARY

Enterprise AI transformation leader who builds capabilities and develops the technical leads and AI product managers who sustain them. Uses hands-on engineering depth to guide investment, product, and operating-model decisions; owns client relationships, delivery, and P&L. Experience spans annual portfolio/program budgets up to $10M at PwC, including a personally originated, sole-source $5M deal sold, staffed, delivered, and invoiced in 16 weeks at 34% margin; founding Deloitte's Anthropic Alliance and scaling it to 250 practitioners and $1B+ in pipeline; and leading a production AI platform serving 1M+ monthly users. MBA, MS Analytics; US Army veteran. Open to relocation.

EXPERIENCE

PwC

SEP 2025 – PRESENT · MIAMI, FL

Manager, AI Strategy & Implementation

Lead AI transformation across annual portfolio/program budgets up to $10M; own client relationships, delivery, and P&L. Lead US/India teams up to 20, including Managers, Senior Managers, and a Director as advisory SME.

CLIENT TRANSFORMATION: ORIGINATION THROUGH OUTCOME

- Personally originated, sold, staffed, delivered, and invoiced a sole-source $5M contact-intelligence and knowledge-automation engagement in 16 weeks at 34% margin. Owned the client relationship, SOW, pricing, staffing/travel budgets, and seven-person delivery team.
- Uncovered $1M+ in annual manual call-tagging labor and a fragmented knowledge process during discovery. Cut call-spike analysis from 1–2 weeks to minutes through automated tagging, proactive alerts, and executive self-service, enabling teams to prioritize service-center automation.
- Unified contact intelligence with an AI-assisted knowledge workflow: detect gaps, gather SME input, draft articles, route human review, and publish to Adobe AEM. Documented processes to make further automation repeatable.
- Reallocated eight of 10 contact-driver staff to AI experience roles (~$800K annual capacity); enabled a six-month plan to halve a $10M/year knowledge workload (~$5M projected annual capacity). Productized the build as a $700K accelerator sold to two additional clients through RFPs.

PORTFOLIO STRATEGY & OPERATING-MODEL CHANGE

- Eliminated $2M in annual SaaS fees after a one-week Bedrock Knowledge Bases prototype. Led architecture and delivery planning for agent workflows targeting 20% lower service-center labor costs.
- Redesigned a client's AI operating model to remove centralized delivery bottlenecks: embedded engineering and product resources in business teams to clarify requirements and automate workflows directly.

AI PRACTICE, GOVERNANCE & PEOPLE LEADERSHIP

- Founded PwC's Agentic AI Customer Service CoE; upskilled 100+ colleagues from Associate to Partner. Established interactive HTML proposals and voice-agent pitch Q&A; delivered reusable assets across AWS, Azure, and GCP.
- Chair monthly steering committees across two client accounts with Chief Data & AI Officer and contact-center leaders; align investment, delivery priorities, risks, and business ownership.
- Own project staffing, performance, hiring interviews, and partner-roundtable reviews alongside four formal direct reports. Coached Associates through Managers in technical execution, client leadership, and delivery ownership; supported three Senior Associate-to-Manager and two Associate-to-Senior Associate promotions.
- Established LLM evaluations, human review, and adversarial testing for production deployments, pilots, and products, including voice/SMS guardrails and prompt-injection defenses.
- Originated PwC's SpaceXAI alliance and led the business agreement from value proposition to signature.

Deloitte

SEP 2023 – SEP 2025 · ARLINGTON, VA

Senior Consultant, AI & Engineering (promoted from Consultant)

Led AI product and delivery portfolios and originated the Anthropic Alliance. Group product manager for the Human Capital AI and AI Contact Center suites; built teams for 10+ GenAI software builds and production deployments.

- Originated and led the Deloitte Anthropic Alliance: grew from zero to 250 practitioners in six months and $0 to $1B+ in Anthropic-related pipeline; deployed 100 practitioners into product, advisory, and delivery roles.
- Led a nonprofit client's AI CoE, advising its CIO, CTO, VP Engineering, and governance leaders on which use cases to fund, scale, or stop. Delivered its platform serving 1M+ monthly users—the largest Bedrock deployment globally by token usage at launch, validated by AWS ProServe.
- On that same client engagement, led internal and Credera engineers through one year of releases and an early Bedrock + Palantir Foundry + Salesforce Einstein integration. In three months, negative sentiment fell from 90% to 30% and renewals grew 10% relative; embedded recurring AI evaluations, human review, and threshold alerts.
- Secured funding and established a University of Virginia partnership; originated and sponsored IEEE-published research comparing LLM-as-judge with traditional NLP metrics for AI system and agent evaluation.
- Built a Government & Public Services evaluation playbook from the research, required at architecture review for all AI deployments subject to client restrictions; standardized context relevancy, faithfulness, and VADER sentiment.
- Led RocketWriter from prototype to Deloitte's first government GenAI production deployment for a space agency client: four months vs. 11 planned, on FedRAMP High AWS. Staffed and managed delivery against the SOW; automated 100+ page report drafting, reallocating seven of 10 staff.
- Originated and led the FDA CDEROne adaptation; validated a 50% reduction in report preparation/review (two weeks to one) in the pilot, then handed off code and Terraform for platform deployment.
- Led Army Recruit360 from idea to a 12-week MVP: 100× more prospects and 15% relative lead-capture growth at seven stations. Prototyped AI voice outreach and Amazon Connect agent assist, supporting a $20M+ extension.
- Built forward-deployed engineering (FDE) teams with Managers reporting on owned projects; led staffing, performance, and SOW delivery for 10+ GenAI engagements and 20+ initiatives across the Human Capital AI Suite.
- Coached engineers into technical leads for teams up to 20 and supported progression from intern through Senior Consultant. Managed 20 interns through a two-month build of a natural-language PowerPoint app adopted internally.

Johnson & Johnson Consumer Health (became Kenvue)

SEP 2022 – SEP 2023 · SKILLMAN, NJ

GenAI Technical Lead (Senior R&D Product Innovation Analyst)

Promoted from Product Innovation Analyst. Led five specialists across engineering, security, and design to build enterprise AI; worked with the Head of AI on strategy and executive stakeholders on governance and adoption.

- Led five specialists to scale GenAI Hub to 10,000 peak monthly active users and access for 22,000 employees. Owned releases, costs, incidents, and adoption through January-September development.
- Co-wrote AI cyber and enterprise policy with the CTDO, CISO, Legal, and Cyber teams; secured approval in two months. Served on the AI council; led Azure OpenAI/Pinecone whitelisting, Firefly selection, and Zscaler controls.
- Initiated OpenAI, Pinecone, and Weaviate relationships through personal outreach; led governance-committee vendor evaluation and selection for enterprise AI, including billion-scale retrieval.
- Negotiated a written Pinecone quote 50% below list. Replaced an $18M Azure Form Recognizer proposal with distributed pdfplumber extraction on Databricks to process documents at scale.
- Raised supplier identifier matching from 13% to 99% (+86 percentage points) through CAS.org validation and an AI extraction pilot, projecting 10,000 hours in annual labor savings.
- Led delivery of clinical-studies RAG, e-commerce trend clustering and summarization, and the Enterprise Goal Setting Assistant, highlighted by CTDO Bernardo Tavares in Authority Magazine.

EARLIER EXPERIENCE

Graduate Research Assistant · Saint Joseph's University — Aug 2021 - Nov 2022
Co-authored four NLP/econometric papers; built Python research pipelines and presented to 100+ attendees.

Data Analyst Intern · La Jolla International Gardens — Jun - Nov 2018
Built rent forecasts and Python lead-tracking pipelines for a 650+ unit residential community.

Academic Programs Assistant · University of San Diego — Sep 2017 - May 2018
Built financial-aid ranking models and owned Salesforce applicant analytics and reporting.

Airborne Infantryman (11B) · US Army — Jul 2015 - Nov 2016
Foundation in disciplined execution, teamwork, and decision-making under pressure.

CAPABILITIES

Strategy: AI transformation strategy · Business cases & value realization · Portfolio prioritization · Operating-model redesign · P&L & budgets · Executive governance · Vendor selection · Team building & performance management

Digital & data: AI CoEs · Product management · Workflow automation · Change management & adoption · Responsible AI · LLM evaluation & adversarial testing · Human-in-the-loop controls · Databricks · Palantir Foundry · Power BI

Engineering: Python · SQL · React · FastAPI · Terraform · AWS Bedrock · Azure OpenAI · GCP Vertex AI · Agentic AI · RAG · MCP · Claude Code · LangChain · CrewAI · Vector search: Pinecone, Weaviate, OpenSearch

EDUCATION

Saint Joseph's University | 2020-2022
MBA, Data Analytics | GPA 3.85
MS, Business Intelligence + Analytics | GPA 3.95

Temple University | 2017-2020
BBA, Accounting | GPA 3.4

CERTIFICATIONS

AI & GenAI: Anthropic Claude Partner Badge - Claude Code (2026) · OpenAI: Technical Practitioner, Cyber Deployment Practitioner, Consultative Solutions Practitioner (2026) · Databricks Gen AI & LLM Industry Specializations - Healthcare & Life Sciences; Retail & Consumer Goods (2025) · Salesforce AI Associate (2025) · DeepLearning.AI Multi AI Agent Systems with crewAI (2024) · AWS AI Practitioner (2024) · Deloitte Advanced Prompt Engineer (2024)

Cloud & data: AWS Cloud Practitioner (2024) · Microsoft Azure Fundamentals (2024) · SAS Business Intelligence & Analytics (2022) · Google Data Analytics (2021) · Galvanize (Diligent) ACL Data Analytics Level 1 (2020)

Additional: Google UX Design (2021) · PA Real Estate License (2020) · IRS Tax Preparation (VITA/TCE) (2020) · PADI Open Water Diving

AWARDS & RECOGNITION

Amplify Impact Award - PwC US Advisory | 2026
Selected by PwC's Advisory CEO: 1 of 10 among 36,000 US Advisory practitioners for AI-driven sales and delivery.

Outstanding Performance Award - Deloitte | Dec 2024
Led the seven-person team that launched a consumer chatbot serving 1M+ users.

STAR Award, Engineering - Deloitte | Nov 2024
Partner-selected; top five of 5,000+ practitioners.

Cavalry Award - Deloitte | Oct 2024
Quarterly top performer on the Army account.

Applause Award, Federal Health - Deloitte | Jul 2024
Three agentic workflow demos presented to 50+ leaders.

Outstanding Performance Award - Deloitte | Jul 2024
Leadership behind the Anthropic Alliance launch.

Workday GenAI Ideathon Winner - Deloitte | Apr 2024
Led the winning team; productized as GoalAssist.
